Professional Licensure Program

84.937 Connecting Mathematical Concepts and Teaching

(This is a required program course leading to Professional Licensure)

This course will investigate the major mathematical concepts and content found in the Massachusetts *Mathematics Curriculum Framework*. In doing so, the goal is for professional licensure candidates to improve their understanding and recognition of the connections within a district' math curriculum. Just as reading is taught at the appropriate grade level, teachers themselves are able to read at a much higher level. So too must math concepts at varying levels be understood so the teaching of math is enhanced and teachers are better able to identify early on those math concepts students will struggle with in later years. Having a better grasp of the connections between math concepts and teaching will also help teachers improve their ability to communicate math ideas to their students in a way that is easy for them to understand.

Location: *Oxford High School
Main Street, Oxford, MA*

Instructor: *Dr. Arnold Good*

Days: *Tuesdays*

Dates: *January 22 to May 14, 2013*

(NOTE: If you hold an initial license in Math, 5-8, DESE requires an additional 6 hours of class time with the instructor beyond the May 14 end date. More information to follow.)

Times: *4:30 to 7:30 p.m.*

Tuition: *\$1300*

Four graduate credits are awarded for this course through Framingham State University, Framingham, MA.

Notice of non-discriminatory policy as to students:

French River admits students of any race, color, national or ethnic origin.

Refunds: Full refund prior to first class;
